### **DETAILED ACTION**

### Response to Arguments

1. Applicant's arguments filed 09/14/06 have been fully considered but they are not persuasive.

On pages 2 and 3 of applicant's remarks, applicant argues that Sonetaka does not teach assigning currently unavailable supplemental channel resources.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208

USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In this case, Barnes teaches applicant's "supplemental channels" (see examiner's answer above), prospectively assigning channel resources are available for prospective assignment (see Barnes, column 17, lines 6-16, see "*preassigned backup channel*". Barnes' "*preassigned*" reads on Applicant's "*prospectively assigning*") and Sonetaka teaches prospectively assigning currently unavailable channel resources to support a future channel for a user associated with the received data notify request *if* the data notify request was received during an open assignment state during which the currently unavailable channel resources are available for prospective assignment (see Sonetaka, Abstract, "*assigning channel preserved in advance*" and "assign radio-channel to traffic... even if radio-signal channel *are all occupied by traffics*", and column

Application/Control Number: 09/728,043

Art Unit: 2617

4, lines 62-65, also see column 7, line 65 to column 8, line 2) and the combination of Barnes and Sonetaka does indeed teach applicant's claimed limitation.

On page 2 of applicant's remarks, applicant further argues that "there is no teaching or suggestion in Sonetaka to assign reserved channels to service A (or B) subscribers when the reserved channels are currently assigned, i.e., not free. Nor is there any teaching or suggestion in Sonetaka to assign unreserved channels to either service A or B subscribers when the unreserved channels are currently assigned".

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208

USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). In this case, Barnes teaches applicant's "supplemental channels" (see examiner's answer above), prospectively assigning channel resources are available for prospective assignment (see Barnes, column 17, lines 6-16, see "*preassigned backup channel*". Barnes' "*preassigned*" reads on Applicant's "*prospectively assigning*") and Sonetaka teaches prospectively assigning currently unavailable channel resources to support a future channel for a user associated with the received data notify request *if* the data notify request was received during an open assignment state during which the currently unavailable channel resources are available for prospective assignment (see Sonetaka, Abstract, "*assigning channel preserved in advance*" and "assign radio-channel to traffic... even if radio-signal channel *are all occupied by traffics*", and column

4, lines 62-65, also see column 7, line 65 to column 8, line 2) and the combination of Barnes and Sonetaka does indeed teach applicant's claimed limitation.

For the above reasons, the Examiner believes that the rejections to claims are proper.

### Conclusion

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nghi H. Ly whose telephone number is (571) 272-7911. The examiner can normally be reached on 8:30 am-5:30 pm Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold can be reached on (571) 272-7905. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
